ACADEMIC EXPERIENCE

East China University of Science and Technology
B.Eng. in *Computer Science* *Sep. 2012 - Jun. 2016*

East China University of Science and Technology
B.Arts. in *Art Design* *Jan. 2013 - Jun. 2016*

Guildhall at Southern Methodist University
Master's in *Interactive Technology* *Aug. 2017 - May. 2019*

SKILL SET

- C++
- Java
- C#
- Javascript
- Visual Studio
- Render Doc
- Pix
- Unreal 4
- Unity
- Perforce/Git

PROJECT EXPERIENCE

SOLO Thesis: Hybrid Rendering Pipeline and Denoising Method **Jul 2018 – May 2019**

- Based on a deferred rendering pipeline, use ray tracing method to handle the global illumination and shadow.
- Learn different frameworks to implement the ray tracer, including DXR, Compute shader, CUDA...
- Design and implement the framework so that frame data can get collected during the runtime for filter training.
- Apply filters to noisy ray traced buffers, compare and analyze the result.

SOLO Morph Engine **Aug 2017 - Now**

- Build from scratch 3D Game engine to learn different aspects of a game engine.
- 210,000 lines of code edition in a one year.

SOLO DirectX 12 Integration in Morph Engine **May 2018 – Aug 2018**

- A rendering hardware interface layer inspired by NVIDIA's Falcor Engine.
- DirectX 12 was integrated into my personal Engine

TEAM Interstellar Racing League **Graphic/Performance Programmer**

- Implement split-screen multiplayer with post-processing enabled in Unreal 4.
- Optimize the game, over 50% performance improvement on the overall frame rate. The game can run at about 55 FPS for 4 players split screen and 60 FPS for single player.
- Deliver a document, *Unreal 4 Performance Guide*.

TEAM Teddy's Fluffy Adventure **General Programmer**

- Account for the game design and be consulted for the art assets, maintaining GDD and TDD
- Making high-level system structure and core game mechanics, including implementing the direction guide line.

WORK EXPERIENCE

Alibaba Group **Hangzhou, China**
Software Engineer Intern, Dept. of Security/ Dept. of Information Platform *Jun.2015 – Sep.2015*

- J2EE backend development of the operating system, Ali Cloud Shield.
- Mainly responsible for several feature sets, and a tool to customize the packaging process for deployment.
- React frontend development of the inner recruitment system.

DaoCloud.io **Shanghai, China**
Full Stack Engineer, Dept. of Development *Dec.2015 – Dec.2016*

- Full stack development including AngularJS frontend and Flask(Python) backend.
- Responsible for the development and maintenance of the DaoStyle component library.
